Experience

Technology Development Manager

GE Idea Works

Research

September 2012 - Present

Manager, Electromagnetic Systems Lab

GE Global Research

10,001+ employees; Public Company; Research

2005 - Present

Driving technology developments in the area of electromagnetic systems and has had the opportunity to develop several novel concepts. Major areas of focus are contactless power transfer, leveraging electrical machines to capture the health of connected mechanical systems, rotating field based electrical impedance spectroscopy, designing electrical machines for specific electrical or mechanical loads, applications of resonating and rotating fields, electromagnetic spectroscopy for diagnostics. Many of the technologies developed are in GE products and most of them are in the process of transitioning through NPIs.

Education

CFA Charter, India

Business Finance, Investment and Financial Analysis

2008 - 2012

Indian Institute of Technology, Bombay

Neural Network for Nonlinear Control System Design

1995 - 2000

Patents (47)

System and method for contactless power transfer in implantable devices

Adnan Kutubuddin Bohori, Somakumar Ramachandranicker, Suma Memana Narayana Bhat

September 30, 2014: 08849402

[en] SYSTEM AND METHOD FOR PREDICTING MECHANICAL FAILURE OF A MOTOR
